

CLAIMS

[Claim(s)]

[Claim 1]A constituent of cosmetics or drugs used as a medicine for external application by which an effective dose of a hydro-glycol extract of algae, such as chlorella, scenedesmus, and Spirulina, and a raw-coffee-beans extract being included at least.

[Claim 2]A constituent of the cosmetics according to claim 1 or drugs being still more desirable if it will be 2/1 to 20/1 if a weight ratio of an algae extract to a raw-coffee-beans extract is made 30/1 from 1/1, and it is 3/1 to 15/1 further.

[Claim 3]A constituent given in any 1 paragraph of claims 1 and 2 to which it will be further characterized by being still more desirable if it is 0.05 to 5% 5% from 0.02 by a weight ratio if a raw-coffee-beans extract is made 8% from 0.01.

[Claim 4]A constituent given in any 1 paragraph of claims 1-3 to which it will be further characterized by being still more desirable if it is 0.5 to 8% 12% from 0.2 by a weight ratio if an algae extract is made 15% from 0.1.

[Claim 5]If each of algae, such as chlorella, scenedesmus, and Spirulina, is made at least 5% A constituent given in any 1 paragraph of claims 1-4, wherein an extract of algae is obtained from hydro-glycol extraction of a mixture included 10%.

[Claim 6]A constituent given in any 1 paragraph of claims 1-5, wherein it is [top 1% / 40 / top 1% / 45] still more preferred [concentration] still if concentration of caffeine acid to the quality of desiccation of a raw-coffee-beans extract is above 50% if it is made.

[Claim 7]A constituent given in any 1 paragraph of claims 1-6 by which tocopherol linoleate being included [tocopherol of 0.01 to 6% of weight ratio, and] if it can do.

[Claim 8]A constituent given in any 1 paragraph of claims 1-7 by which sodium EDTA being included [0.001 to 0.1% of complexing object, and] if it can do.

[Claim 9]A constituent given in any 1 paragraph of claims 1-8 currently carrying out shape, such as a vesicle a lotion, an emulsion, a milky lotion, a microscopic ball, a microscopic grain, cream, gel, perfume and an AEROZORU spray, liposome or ion / non-ion type.

[Claim 10]The directions for a meeting of a hydro-glycol extract of algae, such as chlorella aiming at preparation of a constituent of a therapy of the skin or hair and cosmetics for an anti-medical treatment for inflammation, or drugs, scenedesmus, and Spirulina, and a raw-coffee-beans extract.

[Claim 11]A care-and-cleaning method by cosmetics of the skin or hair applying a meeting with an effective dose of hydro-glycol extracts of algae, such as chlorella, scenedesmus, and Spirulina, and a raw-coffee-beans extract to the skin or hair.
